

## Soil Collection Instructions

Collect one cup of soil for any single growing area that you treat the same: i.e. vegetable beds, or orchard, or flowers, or lawn.

1. Clear the surface of loose duff, leaves, clippings
2. Using a clean shovel dig a hole 16cm - 20cm (6" - 8") deep.
3. Take a thin slice (1") straight down along one side of the hole. (This slice is your soil sample.)
4. Take similar samples throughout your area to be tested, probably 6 to 10 slices.
5. Mix the slices thoroughly. Remove any large roots, stones or chunks of organic matter.
  - a. If the soil is very wet, spread it out on a cookie sheet or cardboard to dry a bit.
6. Pour 1 cup of this mixture into a clean sealable bag.
7. Please place your soil sample in a clean sealed bag, write your full name on the bag and mail it to:

Canadian Customers	US Customers
My Best Garden Ever 3510 6th Avenue North Lethbridge, Alberta T1H 5C3 Canada	My Best Garden Ever 620 North Main Street P.O. Box 326 Lakeview, OH 43331 United States

Once received it takes about two weeks to process the tests and for us to analysis those results and mix the materials for your specific soil. Once we have sent your prescription remineralizing mix you will receive a confirmation email with a tracking number for your product.
